

LICE ARE NOT NICE.

(BUT ANYONE CAN GET THEM)

1) These are head Lice... tiny insects that live on the scalp.

2) If you get Lice, you may not be able to see them, But you'll feel them because they make your head itch.

3) Lots of kids get Lice because they spread very easily, even though they can't jump or fly.

4) So don't try on your friends hats, scarves or other clothing, or borrow their combs or brushes.

5) If your head itches a lot tell your teacher or parents right away. You may not have Lice but they can tell if you do.

6) If you do, your parents will wash your hair with a special shampoo. It kills Lice fast, but it won't hurt you.

9) Your parents will have to keep checking for eggs for another week or so and do another special shampoo after a week so you won't itch anymore!

8) Your parents will also wash all your bedding and clothing and Vacuum the carpets and furniture. Stuffed animals or dolls may need to be bagged up for a while to kill the lice.

7) Then they'll use a special comb to help get all the lice and the lice eggs out of your hair.
